for commercial vehicles**

**25 years of
Proven Performance
and Reliability**

Plain flap

Clear Pass flap

Clear Pass is the recognised leader amongst the spray suppression systems currently available worldwide. Its unique one piece manufacture guarantees its longevity, performance and strength.

You will find Clear Pass has more advantages than any other spray suppression system.

1. Legislation

Clear Pass complies with every aspect of the law on spray suppression (EU Directive 109/2011) with Type-Approval N° A e6 00 0025.

2. No size limitation

Clear Pass is available in any required size, even for small volume requirements.

3. Ease of installation

Clear Pass is easy to install, easy to handle and easy to shape and cut to size without specific tools.

4. Weight

Clear Pass is not unnecessarily heavy and belongs to the lightest spray suppression systems available.

5. Durability

Clear Pass resists to the toughest weather conditions without any risk of breakages.

6. Logo printing

Clear Pass offers durable logo printing, from a choice of 12 colours.

7. Environment

Clear Pass is made from 100% PE and hence 100% recyclable.

8. Quality

Clear Pass is manufactured under ISO 9001 (quality), ISO 14001 (environment) and TS16949:2002, your guarantee for quality.

Clear Pass minimises the dangers of spray hazards, containing much of the water thrown up by tyres and returning it to the road surface, ensuring :

- Improved visibility to following vehicles
- Improved rear vision to drivers
- Less fouling of vehicles
- Making a contribution to road safety

The "Clear Pass Guide to spray Suppression and the law" wall poster, is available on request.

The world's leading spray suppression system for commercial vehicles.
